

Re: Two New Amateur Bands

Dear FCC:

This is my first time submitting a comment concerning the Amateur Radio Service. I have not received my permanent licence yet, but have successfully completed element 1, 2, and 3 of the amateur examinations.

I respectfully submit that the two new proposed bands be accepted as outlined in the petition. Further, I would like to see further amateur assignments in the LF spectrum. I have read some very interesting articles in respect to communication in these frequencies and I think amateur experimentation at these frequencies would be highly beneficial to radio communications in general.

Thank you for listening to my opinions.

Best Regards,
